PROFESSIONAL SUMMARY

Full-stack web developer with expertise in the MERN stack and a focus on building responsive, scalable web applications. Experienced in React, Node.js, and JavaScript, with a strong track record of collaborating on high-quality projects. Skilled in frontend development, API integration, and optimizing web performance.

EXPERIENCE

CAPAZ SOFTWARE LABS | FRONTEND DEVELOPER

March 2023 - Present

- Developed and maintained various frontend components using React.js, CSS, and JavaScript.
- Worked closely with designers and backend developers to integrate APIs into frontend components.
- Improved the user interface for better performance and scalability.

AELIUS TECHNOLOGIES | REACT.JS DEVELOPER

October 2022 - February 2023

- Built and deployed responsive web applications using React.js.
- Collaborated in a team to optimize and enhance frontend performance.
- Worked on bug fixes and feature enhancements.

PROJECTS

SPEECH-TO-TEXT APPLICATION | SPEECH-TO-TEXT FUNCTIONALITY WITH API INTEGRATION

Tech Stack: React.js, Node.js, API Integration | July 2024 - October 2024

- Implemented a speech-to-text functionality that captures audio input and converts it to text.
- Developed features to post the recognized text to a backend API and retrieve text data using another API.
- Focused on creating a seamless user experience with real-time text processing.

DYNAMIC PHP WEB APPLICATION | MULTI-PAGE APPLICATION WITH MODERN UI

Tech Stack: PHP, HTML, CSS, JavaScript | March 2024 - June 2024

- Developed a multi-page web application featuring a modern UI, including carousels and responsive layouts for both desktop and mobile.
- Implemented various UI components to enhance user engagement and experience.
- Collaborated with a team to ensure cross-browser compatibility and performance optimization.

AWARDS
